Darby Super Trac Prestige Handpieces are specifically designed for aerosol reduction and anti-retraction. The active sealing system prevents suck-back of fluid and particles, reducing the risk of cross-contamination. Compared to other air high-speed handpieces, they reduce emission of airborne particles by > 90%. Super Trac Prestige's all stainless-steel construction with high-strength alloy head increases durability and resists dents and handling damage. The small, but powerful head provides 20W of power and superior visibility and access. Available in fiber optic and non-optic models, compatible with a MULTIflex connection. 1 year warranty.
