Popular Pedodontist Products

Cavity Preparation

Pear Burs

Efficiently and accurately removes decay while preserving healthy tooth structure due to its shape

330 830

Operative carbides available in Friction Grip Short Shank (FGSS)!

Cylinder Burs

Ideal for removing large amounts of material due to its straight sides

557 835

Crown Preparation

Extra Short Diamond Kit

- Includes Shorter Than Short Shank (FGSTS) diamonds, making it easier to work on patients with limited cavity openings
- Contains football, modified shoulder and chamfer diamonds each in super coarse, medium and fine grits

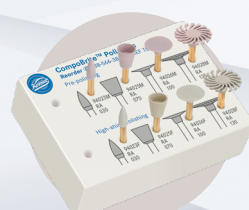

4535A

Finishing

CompoBrite™ Polishers Kit

- Two-step polishers that quickly and effectively create a shiny finish on anterior or posterior restorations due to their specially bonded and interspersed diamond grit
- Adapt to any anatomy with cup, disc, flame and Footsie™ shapes

TD2948A

Highly Filled Resin Kit

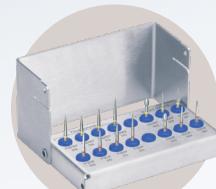

- Includes finishing diamonds, along with matching Q-Finisher® carbides that are pressure sensitive, allowing the same bur to remove the bulk and finish the surface due to special crosscut toothing
- Features ultra-fine yellow polishers that offer outstanding flexibility and conform to any tooth anatomy due to a unique silicone bond

LD0192A

Diamond Finishing Kit

- All-in-one solution for composite and porcelain finishing restorations
- Includes ultra-fine, extra-fine and fine diamonds
