

SOOO ARTFUL

WITH **VISALYS® FILL** & **VISALYS® FLOW**

KETTENBACHDENTAL
Simply intelligent

Light-curing universal Nano-Hybrid-Filling-composite in two consistencies

Visalys® Fill indications

- For any application anterior and posterior
- For all Class I to VI fillings
- For core build-ups
- Composite inlays
- For esthetic shape correction

Visalys® Fill product features

- Pleasant handling
- Does not stick to the instrument, good modeling
- Outstanding mechanical properties
- High filler content: 87%
- Excellent flexural strength: 147 MPa

Visalys® Flow indications

- For application anterior and posterior
- Minimally invasive cavities of all classes
- Can be used for sealants
- Lining and coating of cavities
- Luting translucent restorations
- Repairing restorations and veneers

Visalys® Flow product features

- Pleasant handling
- Perfect balance between flowability and stability
- Self-leveling with non-drip syringe
- Outstanding mechanical properties
- High filler content: 80%
- Excellent flexural strength: 112 MPa

- Can be used with all light-curing bonding agents
- Long filling durability
- Minimal discoloration due to low water absorption
- Low wear resulting from sophisticated filler technology for durable fillings

**FLEX
SHADE
SYSTEM**

Find the right shade with support of the Flex Shade System

The "Flex Shade System", with its chameleon effect, just **five shades (A1-A4)**, covers the entire VITA classical A1-D4 shade scale.

Flex shade chart showing the 5 main shades and the additional Vita shades covered.¹⁾

The **Bleach shade** is also available for particularly bright teeth, as well as an **OA2 opaque shade** to conceal discolored substrates.

A1 LIGHT BRIGHT			
A2 BRIGHT			
A3 MEDIUM BRIGHT			
A3.5 MEDIUM DARK			
A4 DARK			

*Occlusal fillings in artificial teeth, with Visalys® Fill to demonstrate the consistency of the Flex Shade System
