

# 2025 is the Year to Embrace Windows 11

With the end of support for Windows 10 approaching on October 14, 2025, now is the time to upgrade to Windows 11 and ensure your practice's long-term success. This provides a valuable opportunity for dental practices to enhance patient care through technology upgrades.

## THE UPGRADE ADVANTAGE

### Increased Uptime:

Improved performance allows you to see more patients and maximize productivity, leading to consistent patient care and service delivery, ultimately driving revenue growth.

### Software Integration:

Windows 11 seamlessly integrates with the latest AI-powered dental software, unlocking new possibilities for improved diagnostics and treatment planning.

### Stronger Security:

Incorporates advanced security features like built-in antivirus and virtualization-based security, providing robust protection for your patient data and minimizing the risk of cyberattacks.

### Cost-Effective:

Windows 11 licenses are "currently" free for most Windows 10 operating systems. Therefore, you'll only incur minimal charges for remote installation, saving you potentially hundreds of dollars depending on the number of workstations in your practice.

## SEAMLESS WINDOWS 11 TRANSITION

To ensure that your practice moves from Windows 10 to Windows 11 efficiently, we can:

- **Strategically Scheduled Upgrades:**  
We can schedule upgrades before you start work, minimizing downtime and ensuring a smooth transition.
- **Remote Upgrades:**  
Most upgrades can be performed remotely, further minimizing disruption to your practice.

Position your practice at the forefront of technology with Windows 11. Gain a competitive edge by delivering a superior patient experience with a secure and efficient system, maximizing uptime for optimal patient care.

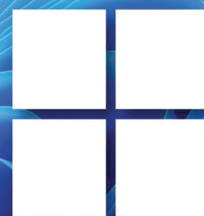

*We believe that one of the most important pieces of technology people will look to refresh in 2025 isn't the refrigerator, the television, or their mobile phone. It will be their Windows 10 PC, and they will move forward with Windows 11.*
