

water with a 

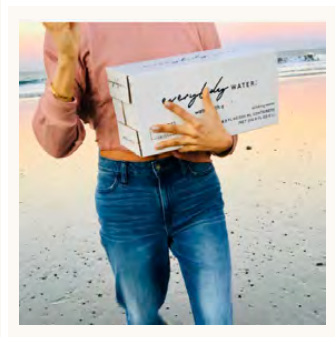

Premium water in a carton with a mission to free *women & girls* from collecting water, giving them the time to attend school, earn incomes, and thrive.

ODP ITEM # 7541810/VPN EBW50

PRODUCT HIGHLIGHTS

16.9oz/500ml carton

12 x 16.9oz/500ml case

Our refreshing, unflavored, premium water is filtered by reverse osmosis. Customers tell us they love the taste.

We source our water from a community system that flows directly into our filling facility where it goes through a multi-step filtration system to meet our taste standards. We don't believe it is sustainable to be hauling around water in trucks from one place to another so we believe sourcing water where we package and filtering on-site makes a lot of sense.

Our cartons are recyclable.

Over 71 million households across the United States have access to carton recycling.

The paper in our paperboard is a renewable material sourced from forests where trees are replenished and keep on growing.

100% of the paperboard in our Tetra Pak® cartons come from Forest Stewardship Council® - certified forests and other controlled sources that can be traced back to a responsibly managed forest.

Our cartons are BPA free and Non-PET.

Our plant-based caps from Tetra Pak are made from sugarcane, a renewable material. This helps to reduce the overall carbon footprint of the carton.

Everybody Water® believes it's not enough to say you're recyclable.

We consider the entire product lifecycle including how our plant-based cartons compare in the sourcing of raw materials, manufacturing processes, and transport requirements to that of aluminum cans and plastic bottles. The renewable materials in the carton lower the carbon footprint because they preserve natural resources. The trees and sugarcane used to make our cartons absorb CO₂ and release oxygen, resulting in fewer greenhouse gases.

Reducing carbon footprint.

The unfilled paper board in our cartons is transported from the factory in paper rolls to the filling location which takes up much less space than unfilled round jars or bottles, significantly reducing the amount of trucks on the road and the associated CO₂ emissions.

Everybody Water® is produced by a WBENC-certified, women-owned, New England-based small business.

Dedicated to donating portions of revenue to supporting clean water infrastructure projects that bring water directly into homes to uplift women and girls globally so they no longer have to walk for water and instead can attend school, earn incomes, and thrive.
