

# MAVERICK WEBINAR

**JUNE 4, 2025 • 6 PM ET**

Say goodbye to the long, tedious process of traditional dentures. With advanced 3D printing technology cutting-edge digital workflows, you can achieve the same reliable results—only faster, stronger, and more precise. Join us for this no-fluff webinar where we will break down the technology, materials, and streamlined workflows that are changing the game.

## WHAT TO EXPECT:

- 1 hour of CE credit
- Deeper understanding of digital denture workflows
- Full understanding of the newest 3D printed materials
- Dive into the benefits of digital dentures:
  - Save chairtime & appointments
  - Deliver superior fit & esthetics
  - Boost efficiency & profitability

Hear from experts in the industry about how digital dentures are now more accurate and require just 2-3 appointments.

**Dr. Lori Trost** is a recognized educator, author, clinical evaluator, and consultant who maintains a comprehensive restorative practice in the greater St. Louis, Missouri area. Dr. Trost has been named a Top 25 Women in Dentistry, honored by the ADA as a Shils Foundation recipient and named a Leader In Continuing Education by Dentistry Today.

**Jamie Stover, CDT**, Senior Manager of Application Strategy and Integration, Carbon, has been a dental laboratory technician for 27 years and in his current role oversees application support strategy globally for dental materials. Jamie is a consultant for labs and clinicians on streamlining production with the digital workflow, adopting new materials and processes.
