

BREWER DENTAL LABORATORY

HAS JOINED DAL

Are you looking for:

- Consistency
- Predictability
- Excellent communication
- The opportunity for a digital upgrade

DAL is pleased to announce the addition of Brewer Dental Lab to our group.

As a Synergy Dental Partners member, you now have access to another Premier provider. If a laboratory isn't providing quality restorations, then you can't provide top quality service as a dentist.

WHY BREWER DENTAL LAB?

Since 1970, Brewer Lab has worked to serve dentists throughout the Tulsa area and across the US. We are here to aid your practice with the latest removable and fixed technologies, and to provide the highest quality products and services for your patients. We understand the importance of communication and consistency and strive to offer excellent customer service.

In the next decade, demand for removable prosthetics is expected to grow significantly faster than for crowns and bridges. To help meet this demand, we offer a variety of solutions for edentulous patients. From a standard denture case to All-On-X planning and fabrication, we have the knowledge and experience to be a trusted partner.

Our team of highly trained experts is always available to discuss design and treatment plans, and we pride ourselves on giving individual attention to your cases.
