

VISALYS® CEMCORE

1 MATERIAL WITH 2 INDICATIONS

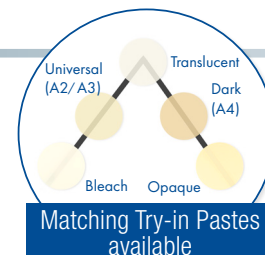

VISALYS CEMCORE CHECKS ALL THE BOXES ... CAN YOUR CEMENT DO THAT?

Visalys® CemCore – Cementation & Core Build-up

Dual-curing, adhesive cementation and core build-up composite

- ✓ One material for two indications: Permanently strong adhesive bond and reliable core build-up
- ✓ Suitable for all restorations
- ✓ Compatible with all materials
- ✓ Suitable for all etching techniques

Yes	No	
		Permanently strong , adhesive resin cement and core build-up.
		Bonds to all substrates - Zirconium & aluminum oxide ceramics, hybrid ceramics, silicate ceramics, metal and composite.
		Suitable for all indirect restorations: Veneers, inlays/onlays, partial crowns, crowns/bridges, maryland bridges, root posts, indirect core build-up.
		Self etching tooth primer - 10 MDP adhesive No light cure needed - use with Any etch technique.
		Restorative primer - 10 MDP adhesive <u>contains</u> silane and hema, No light cure needed
		Thin film thickness 12 microns - restorations fit <u>easily</u> , excellent marginal adaptation.
		"Easy peel" easier, faster cleanup.
		Radiopaque - <u>BPA Free</u>
		Shade stability - aesthetic anterior cases . . . <u>5 shades</u> .
		Retrofit crowns - post/core/re-cement <u>in 1 step!</u>
		High shear bond strength to ALL substrates
		Low water sorption - ensures color stability
		Only (3) components = <u>reduced</u> inventory
