# Welcome to your new preferred lab partner.

## PRICING

Premiere 1 seeks to provide highly competitive price points, first quality FDA approved products and materials, all couched in a first-class customer experience. We do this by seeking to understand the needs and expectations of our customers and then working to deliver on those expectations while working to drive cost out of our processes by eliminating waste and process variability throughout of our workflows.

## SUPPORT SERVICES

Having had an extensive background working in support of Group Purchasing Organizations for many years, Premiere 1's ownership believes very strongly that the relationship between your practices and Premiere 1 goes beyond just the transactional. We believe that a true relationship between the laboratory team and the practice is intimate and the practice should experience the relationship they desire.
