“For years, **my provisional material of choice** for demanding cases has been **Luxatemp.**”

- Dr. Sarah Winter

LuxaCrown

Maximum **strength** and **durability**

LuxaCrown is the long-term provisional with maximum strength and durability that's especially well-suited for complex provisional restorations and phased treatments. It offers the remaining tooth more protection to restore anatomical form, masticatory function, and is ideal for esthetic corrections.

Easily increase patient acceptance and practice revenue, easily and efficiently, without compromising quality.

Use it confidently for

- Multi-unit provisionals
- Full-arch span bridge provisionals
- Temporary implant restorations
- Veneer provisionals
- Complex restorative cases
- Pediatric treatments
- Healthy aging adults
- Palliative treatments
- Emergency treatments
- Bruxism

BEFORE

AFTER

FEATURES & BENEFITS

- Produces stronger provisionals
- Excellent fracture toughness
- High wear resistance
- Reliable durability
- Optimal mechanical properties
- Brilliant esthetics and polishability
- Time and cost savings; affordable alternative to conventional crowns
- Produced chairside

FEATURES & BENEFITS

- Invisible under restorations yet detectable for easy removal of excess
- Beautiful esthetics thanks to optimal transparency
- Optimal adhesion
- Eugenol-free formulation
- Won't stick to instruments
- Flows and mixes easily for ideal handling
- Radiopaque

TempoCem ID Stands out by **blending in**

TempoCem ID is an esthetic, eugenol-free, resin-based temporary cement formulated for optimal transparency that will never impact the shade of your provisional.

It's the ideal choice for reliable posterior and anterior restorations that's easily detectable for excess removal in one piece, even below the gum line!

Zinc Oxide cement TempoCem ID

LuxaFlow Ultra

Ideal for lifelike repairs

Now
available in
Bleach!

- Perfect flowability
- Highly polishable
