GLUMA® Desensitizer

A solution to cover all of your sensitivity needs

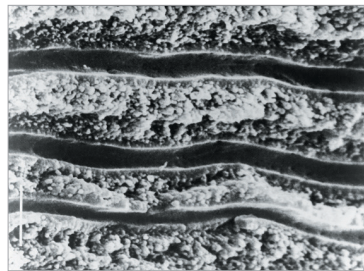

GLUMA Desensitizer

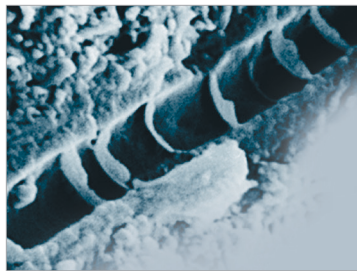

GLUMA Desensitizer has been in the market for more than 20 years and has been used in more than 50 million restorations worldwide to stop and prevent hypersensitivity. One drop of Gluma is all you need and the result is fast and effective. No mixing, no curing and no repetitive steps.

How it works:

- **Desensitize:** GLUMA is the only desensitizer proven to penetrate exposed dentinal tubules up to 200µ. The result is the formation of multiple layers of protein septas that prevent inter-tubular fluid movements due to osmotic changes.
- **Inhibit bacteria:** GLUMA provides a hermetic seal that acts as a microbial barrier, inhibiting bacterial growth.
- **Re-wet:** GLUMA resurrects collapsed collagenous fibers, improving the bond strength of many adhesives.

Dentinal tubule before application of GLUMA

Protein septas following application of GLUMA

GLUMA® Desensitizer	Darby Item Number
GLUMA Desensitizer 5ml	953-0409
GLUMA Desensitizer Clinic Pack 3 x 5ml	953-0425
GLUMA Desensitizer Single Dose 40 x 0.075ml	953-0404
