

ADA CDT CODING

COLLECTION SERIES

INSTRUMENT
MANAGEMENT

Hu-Friedy has created a collection of procedural instrument kits that follow **American Dental Association (ADA) – Current Dental Terminology (CDT) Coding**. Start pairing patients and insurance codes more effectively to move from standardized care to personalized care.

Begin each preventative appointment with an Evaluation Kit and add the supplemental treatment kit based on the patient assessment.

Each kit, uniquely color-coded, offers the highest quality, technology, and ergonomic instrumentation within a small, space-efficient cassette for ensured equipment compatibility and safety. Plastic Test Sticks are included to test for sharpness prior to utilizing instrumentation to provide ergonomic, efficient and quality care to your patients. ADA CDT Coding kits can be ordered easily using a single part code at a significantly reduced bundled cost.

NOTE: Collection Series cassettes can be laser marked with a part code and/or kit description for easy identification. Contact your Hu-Friedy Account Manager for more information.

DID YOU KNOW?

The Mesial 15/16 Gracey evolved from the 11/12, created while clinicians practiced stand up dentistry and the occlusal plane was parallel to the floor. The 15/16 has an extra bend in the functional shank to maintain clinicians' wrists in a neutral position.

DID YOU KNOW?

Anna Pattison Curettes are modified from the original Gracey Curettes. They have shorter, thinner, smaller blades honed at a 60 degree angle with a modified rigid shank specially designed to allow easier access and easier insertion under tight tissue.
