Smart-Matching Composites: Can One Shade Fit All?

The two composite systems on the market today only have one shade, but utilize different technologies to blend with the tooth structure. **CEU: 1.**
Presenter: Gregg Helvey, DDS, CDT

Hurdling Restorative Roadblocks

Learn several “gems” to apply while addressing restorative procedures such as isolation, tooth alignment treatments, and denture impressing. **CEU: 1.**
Presenter: Lori Trost, DMD.

Direct Resin Restorative and Esthetic Dentistry

Discover the advantages that direct resin restoration can bring to your patients and your practice through meticulously documented cases and follow-ups. **CEU: 1.**

Presenters: Abdi Sameni, DDS

Inside Expert Series: Adhesion

The latest adhesion materials, bonding to zirconia, and the evolution of adhesive dentistry via clinical research.

CEU: 2. Presenters: Jorge Perdigão, DMD, MS, PHD; J. William Robbins, DDS, MA; Melissa Seibert, DMD

Posterior Composites Made Easy

Explore new materials and methods to enhance posterior composites' efficiency and effectiveness. **CEU: 1.**
Presenter: Dr. Lee Ann Brady.

Composite – Using it Every Day

To get aesthetic and functional results, four steps are used. Anterior involves a starburst bevel, putty matrix, composite layering, and final polishing. The posterior highlights a sectional matrix and material choice. **CEU: 1.**
Presenter: Brian P. LeSage, DDS, FAACD

Hurdling Restorative Roadblocks

Learn several “gems” to apply while addressing restorative procedures such as isolation, tooth alignment treatments, and denture impressing. These “take-a-ways” will assist in more effective time management as well as ensuring terrific results, less stress for the clinician and satisfied patients. **CEU: 1. Presenter:** Thomas E. Dudley, DMD.

Posterior Composites: Predictable, Practical, Profitable

How new materials and proven techniques can make posterior composite restorations easier to place and allow you to be more efficient with your chair time. **CEU: 1.**
Presenter: Gary Radz, DDS.

Inside Expert Series: Materials

How to evaluate materials for restoring a short clinical crown to optimize preparation and delivery. **CEU: 2.**

Presenters: Dennis J. Fasbinder, DDS; Melissa Seibert, DMD, MS; Richard Bengt Price, BDS, DDS, MS, PhD

Direct Resin Restorations

Explore the clinical indications, applications, and best practices for flowables, bulk fills, and nano and universal composites, as well as for polishers, instruments, and handpieces.

CEU: 4. **Presenters:** Thomas Dudney, DMD; Nathaniel Lawson, DMD, PhD; Adamo Notarantonio, DDS; Marcos Vargas, BDB, DDS.

Dental Sealant Failure, Caused by Improper Placement Technique

Pit and fissure sealants' effectiveness in preventing dental caries relies on adhesion to the tooth. Decay is often detected late, turning preventive into restorative treatments. **CEU:** 1.

Presenter: Shannon Pace Brinker, CDA.

Making Whitening A Success For Your Practice

Fulfilling the desire to have a white smile is the goal of dental practices. Learn practical methods for in-office and take-home whitening. **CEU:** 1. **Presenter:** Shannon Pace Brinker, CDA.

Are Universal One Shade Composites Truly Universal?

Do universal one shade composite systems work in all clinical situations? What adhesives work the best? When should you use alternative materials? **CEU:** 1. **Presenter:** Robert C. Margeas, DDS.

Esthetic-Driven Patient: From Whitening to Restorative

This course takes the dental team through proper records gathering, treatment planning, and case acceptance for whitening and esthetic treatment. **CEU:** 1. **Presenter:** Shannon Pace Brinker, CDA.

Restoring Worn Dentition With Venus Composites

Minimally invasive dentistry may be achieved when using proper materials particularly when restoring a patient's worn dentition. Venus Composites not only allow for good esthetics but are strong enough to withstand mastication forces. **CEU:** N/A. **Presenters:** Riccardo Ammannato, DDS

Ensuring Patient Comfort and Clinical Accuracy During Impression Taking

The benefits of new impression material enhances the accuracy of restorations, minimizes the need for remakes, and raises patient satisfaction. **CEU:** 1. **Presenter:** Shannon Pace Brinker, CDA.

Isolation Techniques for Direct and Indirect Restorations

This webinar will explain the various types of moisture control and isolation methods for placing posterior restorations to ensure long-term success. **CEU:** 1. **Presenters:** Thomas E. Dudney, DMD.

Single-Shade Bulk-Fill Flowable Composite Streamlining Workflow Solutions

Learn about Venus Bulk Flow ONE, the single-shade bulk-fill flowable composite. **CEU:** N/A. **Presenters:** Michael DiTolla, DDS; Devin McClintock DDS

You Made a Great Impression On Me

Learn how to know the applications of accurate, patient-friendly impressions, patient benefits of comfortable impression-taking, and the benefits of impression accuracy and stability to the dental laboratory. **CEU:** 1. **Presenter:** Shannon Pace Brinker, CDA.

PODCASTS In this series, KOLs address clinical techniques, new products, and the latest R&D.

>>> LABORATORY

Back to Basics: Why Analog Dentures Still Matter in a Digital World

As labs become more digitized, the fundamentals of fabricating dentures serve as the basis for successful analog and digital dental prosthetics. **CEU: 1.**
Presenter: Oscar Galvis CDT, MDT, MS.

Successful Impression Taking for Successful Denture Fabrication

What makes an impression successful, the techniques for quality impressions and model creation, and the dentist-technician collaboration needed for success and patient happiness? **CEU: 1.**
Presenters: Jim Collis, CDT and Jeremy Wohlers, CDT.

Model Analysis and Accurate Impression Taking for Perfect Balance of Aesthetics and Functional Dentures

Identifying anatomical landmarks and performing measurements for reference values are undisputed in the fabrication process. Model analysis paired with successful impression-taking contributes to communication between dentists and lab technicians, making optimal tooth setup and functional dentures. **CEU: 1.** **Presenter:** Jeremy Wohlers, CDT.

Analog Denture Workflow Guidebook

Whether you're bringing in and training new lab technicians or pursuing continuous education for more experienced ones, Kulzer eases your work with our **Analog Denture Workflow Education Program**. This comprehensive educational training and operational support ensures that the finest technicians remain with you, equipped with superior tools that empower them to produce exceptional results.

Seamless Collaboration Between Dentists and Lab Technicians as the Foundation for Successful Dentures

The seamless flow of information, quality products, and expert techniques are the basis for a successful analog denture and patient acceptance. Also, define the best practices around dental and dental lab collaboration. **CEU: 1 SI CEU.** **Presenter:** Jeremy Wohlers, CDT and Mike Clark, DDS.
