

Solmetex™ PowerSonic™

ULTRASONIC CLEANING SOLUTION

Advanced Cleaning Action

PowerSonic™ Ultrasonic Cleaner is a patented, plant and mineral based, **100% enzyme free**, catalytic cleaner that super charges the action of your ultrasonic bath and instrument washer using nano-oxygen bubbles. The power comes from a naturally occurring technology platform that provides enhanced gas transfers, instantaneous odor elimination, and the breakdown of organic waste to essentially “eat up” any remaining contaminants.

Why Choose PowerSonic™?

- Effectively removes debris
- Rapidly removes protein — even without ultrasonic action
- Reduces ultrasonic bath sludge and odor
- Inhibits rust formation
- Supports bacterial digestion when aspirated into suction system

Ordering Information

Ordering is easy! Simply call Solmetex or place your order through your favorite dental dealer. Questions? Call Solmetex Customer Care 800-216-5505 or chat with us online at solmetex.com.
