

# An easy way to make a great impression

VivaScan™

The compact and intuitive  
intraoral scanning solution  
for your practice

# Simplicity meets performance

VivaScan is a compact and intuitive intraoral scanning solution for your practice. Due to its standalone design the device can be easily and effortlessly integrated into your practice to make it more efficient. VivaScan is the ideal solution for your entry into the world of digital dentistry.

- 
- ✓ High-accuracy 3D scanning for high-precision digital impressions
  - ✓ Intuitive software and easy to use
  - ✓ Compact in size for a flexible scanning experience
  - ✓ Increased patient comfort
  - ✓ Direct connection with your laboratory
  - ✓ Digital entry to IPS e.max® world- leading all-ceramics

A close-up photograph of a dental office. In the foreground, a white and black VivaScan device is resting on a white plastic tray. The device has a black handle and a white base. A white cable is connected to the side. In the background, a dental chair is visible, and a dental handpiece is mounted on a stand. The overall scene is clean and professional.

## Training & education

For a successful start with your new VivaScan, we offer you web-based, on-demand instructions on how to use the scanning device. We provide additional on-site training and education measures if needed.

# Handling made easy

VivaScan enables you to make digital impressions of your patients' teeth quickly, easily and effortlessly. The intraoral scanner is connected to the laptop with only one cable, which contributes to a convenient handling. High speed provides a fast scanning experience, helping you to treat more patients without wasting time or material.

## **Two tip sizes**

Allow you to determine the best fit for every patient

## **Two button function**

Allows a touch-free operation on the patient

## **True color scan**

Helps your lab to design and fabricate restoration precisely

**Plug & play function**

Allows you to use VivaScan as a portable system after it is connected to a laptop

**Integrated HD camera**

Makes your work through high-resolution photographs and case documentation easier

**Lightweight and ergonomic design**

Makes scanning easy for everyone

# Ivoclar Cloud

VivaScan's straightforward, user-friendly and intuitive software lets you send scans directly to your laboratory of choice in a streamlined workflow. Our integrated file sharing solution ensures secure transfer of data.

# Never been more connected than today

One  
click

You simply upload your scans to the Ivoclar Cloud with just one click and your technician can download them just as easily.

Open file  
format

All files can be downloaded from the cloud in an open file format, so your technician is free to work in his or her preferred way.

No  
subscription  
fee

Your VivaScan includes all software services, without you having to pay a subscription fee.
