

# The power to outperform.

The dynamic partnership  
between Dell Precision  
and NVIDIA RTX™ Ada  
Generation GPUs  
sets new standards.

Dell Precision 5680, 7960, 5860 and 7780 Workstations.

The revolutionary design of the NVIDIA Ada Lovelace architecture surpasses the MacBook Pro. Tests run with 13th Gen Intel® Core™ processors show dramatically higher performance and ushers in a faster future for 3D graphics and GPU-accelerated computing.

The Dell Precision workstations power CPU and GPU intensive applications with enterprise-grade components including Intel processors, professional NVIDIA graphics and advanced thermal designs keep your system cool, quiet and running at peak performance.
