# Testimonials

See what others have to say about  
**Open Dental Practice Management Software.**

It is my assertion that if every dentist downloaded the trial version (of Open Dental) and got a test data conversion (both FREE) and actually TRIED it, the other PMS companies would ALL go out of business. It is that good. It is that much of a BETTER VALUE. It blows the others away.

- **Michael Barr DDS**, [dentaltown.com](http://dentaltown.com)

The customer service is amazing both in results and calming frantic staff. The ability to customize to any practice environment has caused me to recommend this DPMS to all of my dental consultant clients.

- **Lauren Bursell**, [Best Dental Help](#)

Absolutely hands down the best dental software. I have used many others and truly can say it's my favorite.

- **Suzanne**, [Facebook](#)

Open Dental offers every feature you could want in a dental practice management software, at a fraction of the price compared to its competitors.
