

Take membership administration off your to-do list.

A dental membership plan provides a clear path to greater recurring revenue and patient satisfaction — but, it requires dedicated time and resources to do right. The good news? Kleer and Membersy provides all your practice needs to reach your goals.

Overcome common challenges with an experienced partner

It's difficult to know how to build your plan, like which services to include and how to price it.

Tap into 20+ years of combined experience in membership plans, and gain insight on how to design and grow your plan. Plus, with Kleer's SmartPricing™ formula, you'll have confidence that you've set the best rate.

Patients have to pay annual fees upfront, and they have to come back into the office to renew their plan.

Member retention is patient retention. Kleer and Membersy provide a subscription solution that automates renewals and handles billing, with both monthly and annual options available.

Manually updating members' status and plan usage is time-consuming and can increase the risk of non-members receiving discounts.

Kleer and Membersy will integrate with your practice management system to easily enroll patients, track which savings have been used, and post payments. You can even automatically invite your uninsured patients to join.

Your team already has a lot of competing priorities, and keeping the membership plan top of mind isn't always one of them.

Kleer and Membersy provide training to help teams feel confident in providing the plan to their patients. And, we take member questions off their plate with our dedicated member support team.

Your plan needs to comply with DMPO regulations. And, there are penalties for non-compliance.

You should be able to focus on growth, not regulations. Kleer and Membersy is licensed where you operate and keeps your plan in compliance.

**Make the most of your membership with
Kleer and Membersy's all-in-one solution.**
