

OVERJET

INTRODUCING SMART IMAGING: IMAGING SOFTWARE & ARTIFICIAL INTELLIGENCE, ALL IN ONE TOOL.

Smart imaging does more than just capture images. It brings them to life– using artificial intelligence to enhance images, streamline your workflow, and visualize your patient’s oral health like never before.

THE NEXT LEVEL OF DENTAL CARE

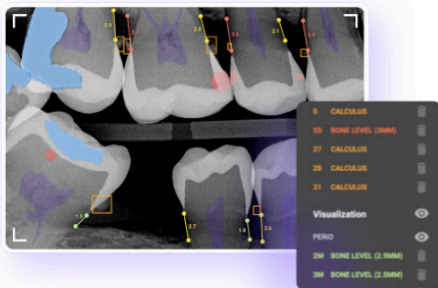

IMAGING + AI IN ONE WORKFLOW

IRIS combines the most powerful imaging software with the most advanced dental AI analysis. Why pay for separate tools, when one tool does it all?

MAKE EVERY IMAGE CRYSTAL CLEAR

Iris is the only imaging system that is cleared by the FDA to enhance low-quality images with AI without losing important clinical details. Now, every image is crystal clear.

GO FROM BLACK AND WHITE TO FULL COLOR

Standard imaging systems capture X-rays in black and white. Iris captures images and automatically adds AI findings to highlight oral disease so can show your patients what you see.

“IRIS IS ONE OF THE BEST INVESTMENTS I’VE EVER MADE FOR MY PATIENTS. THE AI SHOWS ME IMPORTANT FINDINGS THAT I SIMPLY COULDN’T SEE WITHOUT IT, ON A STANDARD X-RAY. ONCE YOU GET IRIS, IT’S A NO-BRAINER.”

DR. PHILLIP KRAVER, CAPE DENTAL CARE
