

Superior KaVo performance

Smaller Head Size, Snap-On Facility, and Ceramic Bearings

Experience fast and precise working with the EXPERTmatic™ series attachments thanks to a smaller head size, snap-on facility and ceramic bearings. The Expert Series all features quality stainless steel construction and advanced hygienic solutions.

Smaller Head Size

Improved treatment efficiency and accessibility thanks to the smaller head size.

Higher chuck strength

Holds the bur firmly in place and delivers precise cutting performance.

Durability and longer life

With dent resistant heads for greater endurance.

EXPERTgrip™

EXPERTgrip surface allows for better handling and ergonomics.

Cooling

Optimal cooling at bur-tip with multi port spray.

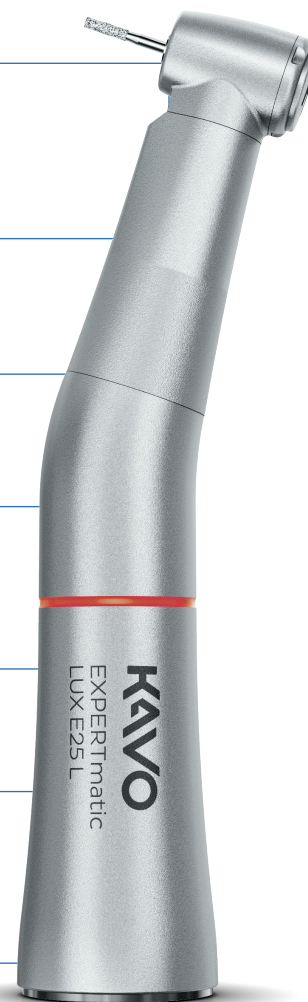

3-port spray

Limits clogging of the spray channels with field replaceable water filter.

Replaceable Spray Microfilter

Field replaceable water filter reduces servicing needs.

motor standard tube (69 inch)
Part no. 1012.8541

PRODUCT FEATURES AND BENEFITS

KaVo's Superior Performance comes standard on all EXPERTmatic attachments.

- Dent resistant stainless steel heads
- Superior chuck strength of 30N
- Smaller head size on E25L
(Head Height: 14.7mm and Head Diameter: 10.2mm)
- Smoother EXPERTgrip surface
- Multi-port spray
- Spray micro-filter
- Durability and longer life with dent resistant heads
- Higher chuck strength holds the bur firmly in place and delivers precise cutting performance
- Improved treatment efficiency and accessibility thanks to the smaller head size
- Better handling and ergonomics with EXPERTgrip
- Optimal cooling at bur-tip with multi port spray
- Limits clogging of the spray channels with field replaceable water filter (E25 only)
