

Simple and Intuitive Surgical Units

Used in combination with KaVo MASTERSurg™ LUX Wireless and EXPERTSurg™ LUX, SURGmatic instruments offer highly precise performance and comfort.

KaVo SURGmatic instruments offer good speed and torque: from smoothing the alveolar ridge to fixing implants, micro-surgery, ENT, retrograde apicetomy, bone splitting and much more.

CoolHead Technology

For improved patient safety

Optics

For better visibility of the surgical field

EXPERTgrip

EXPERTgrip surface allows for better handling and ergonomics

Speed Increasing Contra-Angle

With a ratio of 1:5 and up to 200,000 rpm

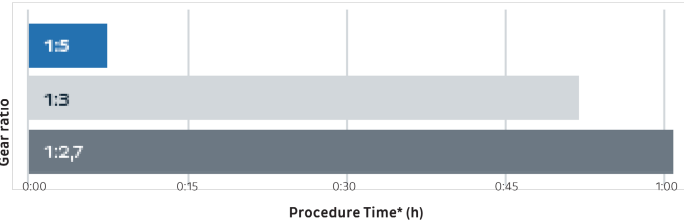

PRODUCT FEATURES AND BENEFITS

KaVo SURGmatic™ instruments offer good speed and torque: from smoothing the alveolar ridge to fixing implants, micro-surgery, ENT, retrograde apicectomy, bone splitting and much more.

Combine with KaVo Surgical System for dental surgery that is not only easy to use but that provides safe and highly precise tools for dentists and dental surgeons to face their daily challenges.

The SURGmatic S15 L Pro is the fastest surgical high-speed on the market

* Representation of the average period of time for cutting through a defined sample of zirconium oxide
