## Highlights

### Quad Stream technology

Unique X-shaped Quad Stream tip separates flow into 4 water jets, which cover more area between teeth and along the gum line. Get a faster, deeper clean without the hassle of string floss.

### Cleans from below the gumline

The Quadstream technology removes up to 99% of plaque from 6mm deep periodontal pockets.

### Pulse Wave technology

Gentle pulses of water keep you going and guide you from tooth to tooth in Deep Clean mode — so you get it right every time.

### 2 modes, 3 intensities

Choose the clean that suits your smile. Clean mode delivers continuous flow for effective everyday cleaning. Deep Clean pulses for more thorough cleaning. Adjustable intensity level adapts for comfort.

### Complete clean in 60 seconds

Access those hard-to-reach areas with a nozzle that rotates 360 degrees, so that you can use the device in any orientation. Get a thorough 360 clean in just 60 seconds from start to finish.

### Fast charging with USB-A to Small Plug cable

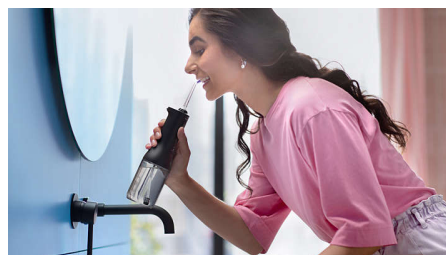

Convenient charging with USB-A to Small Plug cable. You can clean for up to 14 days on just one charge.

### 250ml reservoir

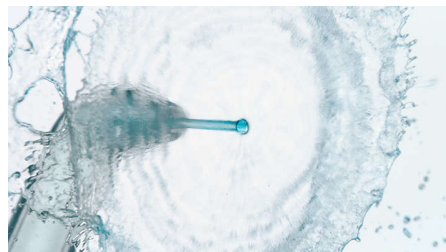

Reservoir capacity of 250 ml holds enough water for a recommended 60-second clean. Simply twist and remove or use the side-fill door for easy refilling.

### Effortless technique

Just point, press and clean for more effective flossing. Aim the tip between your teeth and along the gumline and let it do all the work for you!

### Standard tip for spot cleaning

A standard single-stream tip boosts pressure for spot cleaning and removing food debris when you need it.
